

West Lancashire Community Safety Partnership

Partnership Plan 2009 Refresh *2008 to 2011*

Foreword

I am delighted as Chair of the West Lancashire Community Safety Partnership to introduce our refreshed Partnership Plan for West Lancashire. This Partnership Plan is a key strategic and operational document and reflects our community safety priorities. It is refreshed annually to ensure we are focussed on current issues.

Our Partnership has a proven track record for meeting government targets and responding to emerging issues that affect our local communities. We have successfully developed partnership working and continually strive to improve community engagement and participation. We recognise there are significant social and economic challenges ahead and we understand that the fear of crime and anti-social behaviour remains disproportionately high compared to recorded levels of crime.

We will work to embrace the six hallmarks of effective partnerships; empowered and effective leadership, visible and constructive accountability, intelligence-led business processes, effective and responsive delivery structures, engaged communities and having the appropriate skills and knowledge in place.

May I assure you of my personal commitment to making West Lancashire the safest place to live, work and visit and on behalf of my partnership colleagues may I commend this plan to you.

Introduction

The West Lancashire Crime and Disorder Reduction Partnership (CDRP) was established in response to the Crime and Disorder Act 1998. The act required local authorities and the police, together with other key agencies and the community, to work together at district level to develop and implement strategies for reducing crime and disorder in the area. In 2006, the Police and Justice Act made several amendments to the Crime and Disorder Act including the requirement for Responsible Authorities to convene a County Strategy Group in two-tier areas, in Lancashire this is being fulfilled by the Safer Lancashire Board.

The West Lancashire Crime and Disorder Reduction Partnership is one of six thematic groups within the West Lancashire Local Strategic Partnership. Within the Community Safety Partnership there are 5 responsible authorities that have specific duties to deliver community safety.

- West Lancashire Borough Council
- Lancashire Constabulary
- Lancashire County Council
- Lancashire Fire and Rescue Service
- NHS Central Lancashire

The main focus of the Partnership is to seek balanced solutions to our local issues and provide short, medium and long-term action plans to successfully engage our communities in securing sustainable solutions to these issues. The West Lancashire Community Safety Strategy 2005-2008 previously provided a framework for delivery and contained our priorities and performance indicators.

One of the key priorities contained within the strategy was the delivery of PSA 1, which required a 15 % reduction against British Crime Survey (BCS) recorded crime by March 2008. West Lancashire CDRP volunteered an uplift of 3.5% on this challenging target and in March 2008 we successfully achieved our PSA 1 target with a 23.1 % reduction against BCS comparator recorded crime.

In October 2007 the Government published a new set of Public Service Agreements (PSAs) that cover the period April 2008 to March 2011. The new PSAs set out the Governments high-level objectives for public service delivery, including a new PSA 23 entitled 'Make Communities Safer'.

With the introduction of PSA 23 there is some shift in emphasis from the Government with a stronger focus on more serious violence; greater flexibility for local partners to deliver local priorities; a specific outcome to increase community confidence; and the need to reflect the increased threat to communities posed by violent extremists.

The Police and Justice Act 2006 made a number of key amendments to the Crime and Disorder Act to allow recommendations from a review of the act in 2004-05 to be implemented. This included a new duty on CDRP's to produce an Annual Strategic Assessment and to prepare and implement an annual Partnership Plan. This repealed the duty to produce a triennial 3-year Community Safety Audit and Strategy.

CDRP's are now required to convene a strategy group made up of responsible authorities and the West Lancashire Strategic Review Group (SRG) fulfills this role in West Lancashire. This group has to date fulfilled its responsibilities in respect of the production of the *2009/10 Refreshed Annual Assessment and Partnership Plan*. Additional changes introduced in the Police and Justice Act 2006 required the SRG to:

- Ensure that an information sharing protocol is in place to facilitate information sharing between partners.
- Consult the community who live or work in the local area concerning the levels of crime, disorder and substance misuse and what issues the CDRP should prioritise.

The act also widened Section 17 statutory responsibilities to include anti-social behaviour and other behaviour adversely affecting the local environment and the misuse of drugs, alcohol and other substances.

Following the production of the Strategic Assessment, members of the Crime and Disorder Reduction Partnership have devised, developed and together will deliver the annual Partnership Plan for 2009 - 2010 for West Lancashire. The annual Partnership Plan highlights the local strategic priorities for tackling Community Safety.

It was formulated from a combination of approaches:

- Findings from the annual Strategic Assessment
- The Lancashire Local Area Agreement 2008
- Home Office Guidance with national and regional priorities.
- Public consultation exercises and contributions from Community Organisations.

Vision

The central vision of West Lancashire CDRP is to continue to ensure that West Lancashire remains one of the safest boroughs in the country to live, work and visit. We will achieve this aim with a continued focus on tackling Anti-Social Behaviour and other key crime and disorder concerns that have been identified within the Strategic Assessment and by ensuring that community safety issues continue to be a priority for all our partners.

West Lancashire CDRP have embraced and will deliver through the Partnership Plan the vision set out in the National Community Safety Plan 2008/11 which aims to:

- Build on the significant reduction in crime achieved over recent years, with fewer people victims of crime, especially the most serious crime – violent, drug and alcohol related crime – and the public will be protected from the most harmful offenders: and
- Local agencies will be accountable and responsive to the needs and priorities of the local community, leading to increased public confidence in those agencies.

Community Safety Priorities

The aim of the Strategic Assessment was to provide West Lancashire CDRP with a detailed summary of key issues and priorities for West Lancashire for the next 12 – 24 months. The assessment has informed the production of the West Lancashire CDRP Partnership Plan 2009/10 and the assessment has provided the evidence and justification for strategic decision-making, particularly in respect of identifying community priorities.

The Strategic Assessment is broken down into five sections that reflect different areas of business and response:

1 Crime and Disorder

- Target the root cause of crime and disorder. Alcohol has been identified as a key theme that impacts on crime and disorder and as such is a significant root cause of offending behaviour.
- Promote safety and improve fear of crime, including confidence and satisfaction. It is important that residents in West Lancashire feel safe and have a good quality of life
- Protection of vulnerable people and families. The threat includes identification and intelligence gathering on high-risk violent offenders and persistent offenders. This will enable a pro-active response in minimising any potential risk, while supporting policing these individuals.
- The reduction of violent crime and disorder, especially those that incur injury and tackling violent behaviour that causes concern within the community.
- Reduce repeat victimisation of domestic violence. This crime category is often under reported and we aim to encourage victims to report incidents in order to identify the true extent of the problem.
- Maintain reductions against criminal damage.
- Reduce fires and fire related deaths or injuries.
- Ensure there is a coordinated approach to tackling re-offending, with particular focus on prolific and other priority offenders.

2 Anti-Social Behaviour

- 2.1 Tackling and reducing anti-social behaviour related to young people. To help combat this behaviour strategic priorities will be around targeting unlawful licensable activities which include the supply of alcohol, proxy sales and underage drinking.

3 Substance Misuse

- 3.1 Reduce the harm to individuals and communities caused by substance misuse, including reducing acquisitive crime. The alcohol harm reduction strategy has established five priority areas across West Lancashire; Enforcement, Education, Partnership Activity, Industry Accountability and Media and Communication. Alcohol has been identified within the strategic assessment as a root factor in many issues and must be a strategic priority for partners.
- 3.2 Reducing the availability (including supply and use) of drugs.

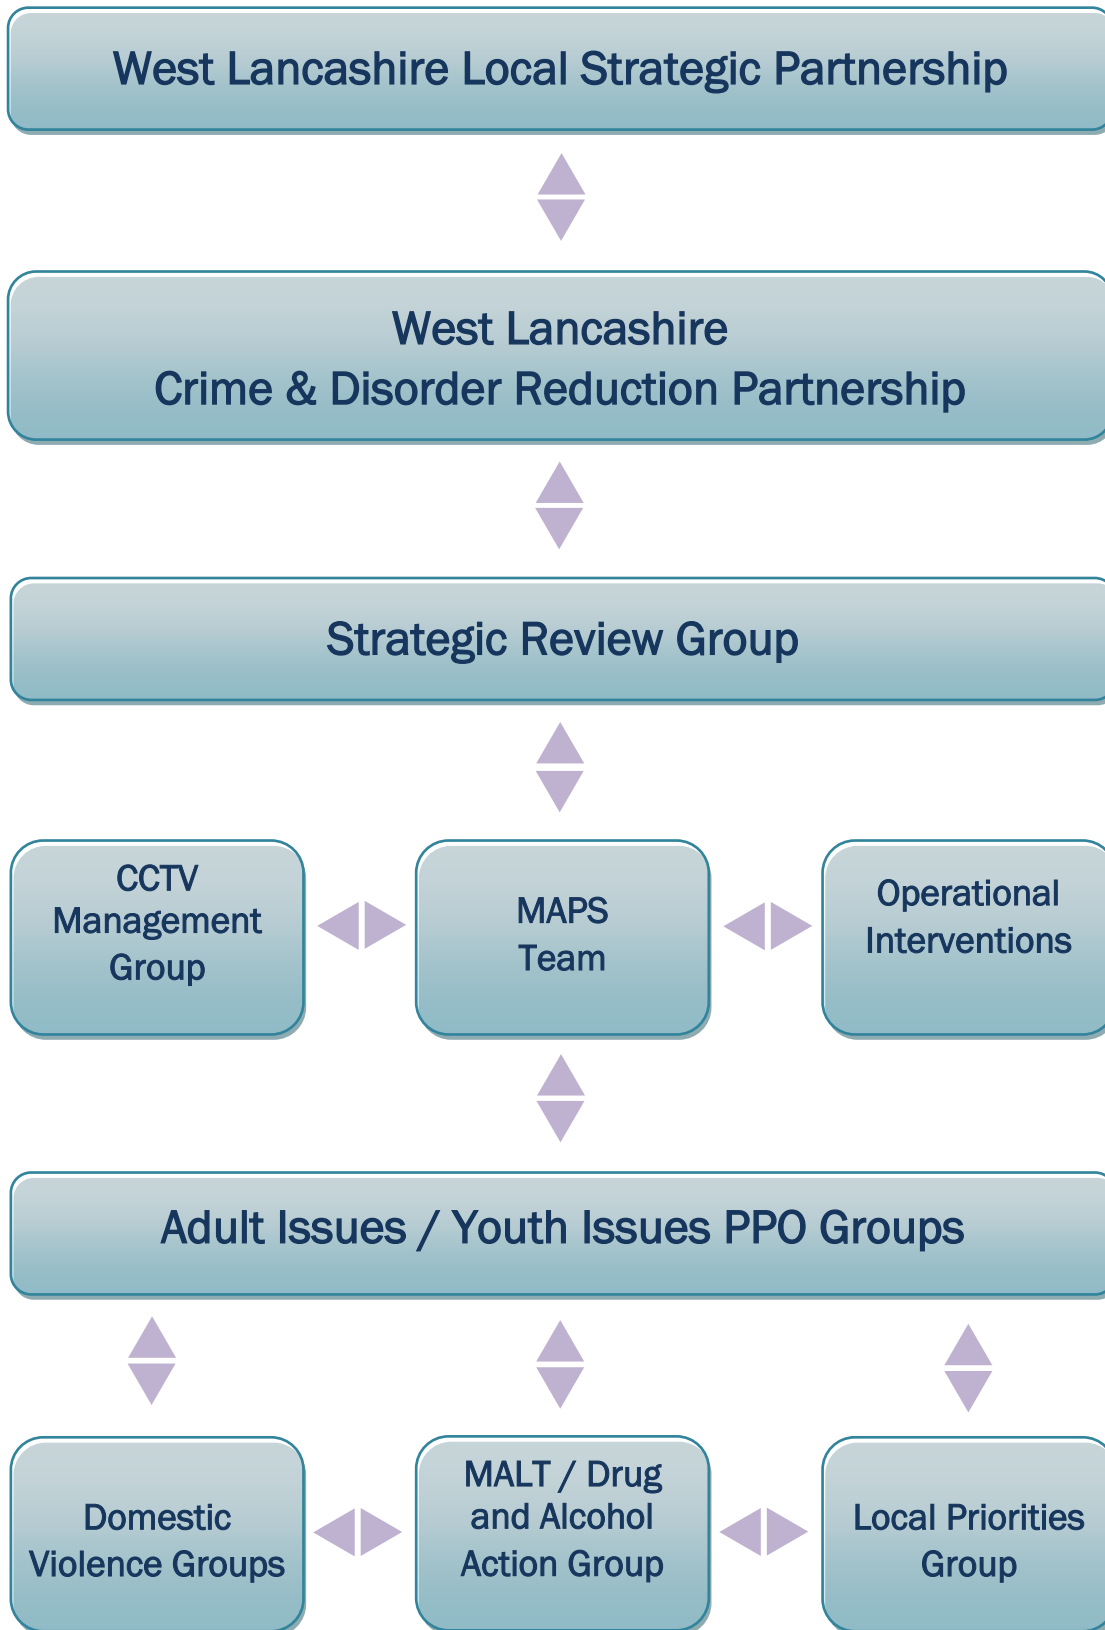

4 Quality of Life Issues

- 4.1 Reduce the number of fatalities and serious injuries from Road Traffic Collisions, in conjunction with the Lancashire Road Safety Partnership.
- 4.2 Tackling the effects or signals of Anti-Social Behaviour to improve public perception.

5 Community Cohesion

- 5.1 Prevent all types of extremism and reduce hate crimes against identified sections of the community. This will be achieved through working closely and in support of local groups including the West Lancashire Community Cohesion Thematic Group.
- 5.2 Providing positive diversionary activities for young people. This will include developing strategies to reduce levels of offending and the risk of becoming a victim of crime.
